VEDANTSINH GOHEL

Toronto, ON | 905-617-1621| **vedqntgohel@gmail.com**

Objective: To leverage my expertise in software development, creative problem-solving skills, and passion for technology to help organizations drive digital transformation and innovation. Seeking a challenging role as a software developer where I can contribute to the success of projects and grow professionally

HIGHLIGHT OF QUALIFICATIONS

- Proficient in programming languages such as Java, Python, C#.

- Strong experience in software development methodologies such as Agile and Scrum.

- Excellent problem-solving skills and ability to troubleshoot technical issues.

- Experience with database systems like Oracle, MySQL, SQL Server, etc.

- Good understanding of software design patterns and architecture principles.

- Familiarity with version control tools like Git, SVN, etc.

- Effective communication and collaboration skills to work with cross-functional teams

TECHNICAL SKILLS

Programming Languages: C#, Java, Python, SQL

Web Development: HTML, CSS, JavaScript

Database Management: SQL, Oracle, cPanel

Technologies: .Net framework, ASP.Net, Agile methodologies

EDUCATION

Program: Advance Diploma in Computer Programming and Analysis

George Brown College | Toronto, ON   January 2022 - April 2024

KEY Courses/concepts:

- Object-Oriented Programming

- Data Structures and Algorithm Design

- Web Development

- Programming Languages (Java, Python, SQL)

- Systems Analysis and Design

- Database Management

Academic Project
George Brown College | Toronto, ON

Flight Reservation System

- Designed and implemented a flight reservation system using C#, which was able to manage flight bookings efficiently and effectively.

- SEP 2022 - DEC 2022: Led a team of 4 developers to complete the project, which included designing the system architecture, implementing the user interface, and integrating the database.

Quiz App

- Developed a user-friendly Quiz App using Java that included functionalities such as user authentication, score tracking, and feedback for incorrect answers to test users' knowledge on various subjects.

- APRIL 2022 - SEP 2022: supervised a group of four developers to finish the project, which involved creating the system's structure, developing the user interface, and connecting the database
